LANDON BEARD

IT Specialist II | Cybersecurity

Spring Hill, Florida | lanbeard105@gmail.com | linkedin.com/in/landon-beard | github.com/DarthBitBeard | landonbeard.beardlab.us

PROFESSIONAL SUMMARY

IT Specialist II and CompTIA CySA+ holder with a decade of technical experience spanning corporate IT support and live production technology. At Stan Weaver, provides advanced end user support, administers Active Directory, and builds Python automation that removes manual work, including document processing with PII redaction deployed as a self-restarting Windows service. Holds CompTIA CySA+, Security+, A+, and Network+, the CSAP and CSIS stackable certifications, ISC2 Certified in Cybersecurity, and Microsoft Azure Fundamentals. Outside the day job, runs a high availability home lab behind a redundant OPNsense firewall cluster with DNS filtering and automated disaster recovery, built Lantern, an open source local-first network scanner, and operates a live defensive honeypot. Also leads Team SpringHill_Folders, a distributed computing team supporting protein folding research. Focused on vulnerability management, identity and access, and detection work that holds up in production, not just in a lab.

CERTIFICATIONS

CompTIA CySA+ (CS0-004) | Oct 2026, expires Oct 2029

CompTIA Security+ ce | Oct 2026, expires Oct 2029

CompTIA Secure Infrastructure Specialist, CSIS | Stackable, Oct 2026

CompTIA Security Analytics Professional, CSAP | Stackable, Oct 2026

CompTIA A+ ce | May 2023, expires Oct 2029

CompTIA Network+ ce | Oct 2023, expires Oct 2029

CompTIA IT Operations Specialist, CIOS | Stackable, Oct 2023

ISC2 Certified in Cybersecurity, CC | May 2026

Microsoft Certified: Azure Fundamentals | Dec 2023

HDI Customer Service Representative | Oct 2025

Coding Boot Camp Certificate, UT Austin | Jun 2024

Databricks Generative AI Fundamentals | Oct 2026

Databricks AI Agent Fundamentals | Oct 2026

EXPERIENCE

Stan Weaver North & Central Florida, Tampa, FL

IT Specialist II | Nov 2024 - Present

- Provide advanced technical support for end users across hardware, software, and network issues, resolving escalated problems through methodical root-cause analysis.
- Administer Active Directory user accounts, group memberships, and access permissions.
- Designed and built an internal commission-reporting application (Python, FastAPI, SQLite) with OCR document processing (OpenCV, Tesseract) and PII redaction, deployed as a self-restarting Windows service.

IT Specialist | Jul 2023 - Nov 2024

- Delivered frontline IT support for hardware, software, and connectivity issues.
- Performed system setup, configuration, and routine maintenance.
- Documented solutions to support team knowledge sharing.

Christian Life Fellowship, Cape Coral, FL

Tech Director | May 2022 - Jun 2023

- Led technology operations, including live production systems, for weekly services and events.
- Coordinated technical volunteers and event technology needs.
- Resolved technical issues in real time to keep services running smoothly.

Grace Family Church, Tampa, FL

Tech Lead | Sep 2021 - Jun 2022 Live Video Tech | Nov 2015 - Jun 2022

- Led the live video production tech team.
- Operated and maintained live video production equipment for weekly services and events across six-plus years.
- Troubleshot AV issues in real time during live productions.

PROJECTS

Lantern, Open Source Home Network Scanner | Oct 2026 - Present

- Built from scratch a local-first scanner (Python, standard library only) that finds devices on a private home network, flags risky open ports in plain English, and shows what changed since the last scan.
- Defensive only: private subnets only, no brute force or exploits, with results in a local SQLite file with scan history and diff, plus a local web dashboard.

T-Pot Honeypot, Live Attack Telemetry | Oct 2026 - Present

- Deployed a T-Pot honeypot on an isolated Oracle Cloud virtual machine with only decoy services exposed, collecting real SSH, SQL, SIP, and HTTP attack telemetry through Cowrie, Dionaea, Sentrypeer, and Tanner.
- Logged 149,551 attacks in 24 hours (Oct 30, 2026); counts and trends are shared only in sanitized form, with no source IPs or payloads published.

Hands-On Cybersecurity and Offensive Security Labs, Hack The Box | May 2026 - Present

- Practical training in vulnerability assessment, network enumeration, and privilege escalation using Kali Linux tooling.
- Bash and PowerShell scripting to automate reconnaissance and interact with target systems.
- Translating offensive security findings into defensive strategies for enterprise networks.
- BSides Tampa CTF: placed 11th overall as a team, capturing 19 of 24 flags, and was named Team MVP (as Beard98).

VOLUNTEER LEADERSHIP

Folding@Home, Team Lead, Team SpringHill_Folders | Mar 2026 - Present

- Founded and manage a multi-node distributed computing team (Linux and Windows nodes) supporting protein-folding research at the Washington University School of Medicine.
- Tune GPU and CPU workloads and thermal profiles for 24/7 high-uptime contribution.
- Reached 220,000,000 points on October 29, 2026, certified by Folding@home.

EDUCATION

Southeastern University | 2020 - 2021
Hillsborough College | 2016 - 2018

TECHNICAL SKILLS

Security: Network security, information security, vulnerability assessment, vulnerability management, incident response, identity and access management, penetration testing (lab), Kali Linux, firewall and DNS filtering

Systems and Support: Active Directory, Windows Server, Office 365, Hyper-V, network administration, firewalls, remote troubleshooting, hardware support

Scripting and Development: Python, FastAPI, PowerShell, Bash, SQL, SQLite, JavaScript, React, Node.js, HTML

Cloud: Microsoft Azure
